

Molly Eirinberg, MA, CCC-SLP
Myo Munch Speech Therapy, PLLC

Location: Chicago, IL

TITLE: THE ESSENTIAL ROLE OF MYOFUNCTIONAL AND PHYSICAL THERAPY IN SUCCESSFUL ORTHODONTIC OUTCOMES

Description: Myofunctional Therapy is defined as improving the function and coordination of the muscles of the face, mouth, and tongue. The muscles and their function are critical to the oral structure. As such, they will impact the long-term success of orthodontic treatment. Molly Eirinberg will deliver a stimulating lecture on the foundational principles of Myofunctional Therapy.

Outcomes: By the end of the presentation, attendees will better understand the following

- Myofunctional Therapy Treatment Function Areas
- Red Flags for a Possible Orofacial Myofunctional Disorder
- Long-term Impact
- Goals of Myofunctional Therapy
- Assessing and Evaluating Children With OMD's

Background of Speaker: Molly Eirinberg graduated from the University of Indiana with a Masters in Speech Language Pathology. While working in New York, Ms. Eirinberg received her certification in Myofunctional Therapy and PROMPT. Molly moved back to Chicago for a Myo Practice. She opened her own Private Practice specializing in Myo, Speech, and Feeding.
