

SureSmile® Aligner by Dentsply Sirona

The facts are in.

If you are offering clear aligner treatment, you know that clear aligners can have a significant impact on your practice growth. However, if you are like the 95% of clinicians surveyed, you agree that having to add refinements to clear aligner treatment increases chair time and impacts patient satisfaction.¹

In addition, 81% of clinicians agree that they need to manage their patients' expectations around the length of time it might take to complete the clear aligner treatment.¹

Increase practice efficiency and patient satisfaction with SureSmile Aligner:

- SureSmile Aligners require **50% less refinements than other aligners.**²
- For Class I cases, the average SureSmile Aligner treatment is **three months quicker than for Invisalign®.**¹

DID YOU KNOW?

92% of clinicians need to over-estimate the Invisalign® treatment length when discussing the treatment timeline with patients because the treatments will require refinements at some point.¹

It's easy to get started with SureSmile Aligner:

- Open-architecture platform **accepts STL files from most scanners**
- Virtual and in-person **training options** to fit your schedule.
- Direct access to **system support** and **digital lab team** with over two decades of experience in case planning.
- SureSmile software is **able to link CBCT/Pano/Ceph/Facial photos with a 3D model** to ensure predictable and biologically achievable results.
- **Convenient, cloud-based software** provides easy access to data, 24/7.
- **Clinician control of robust treatment planning tools** that enable tooth movements, simulations, and alternative treatment scenarios in real-time.

1. Third-party survey among 213 U.S. Adult Dental Patients who have not used clear aligners, August 2020.
2. Claim based on data analysis of SureSmile® Aligner global refinement rate compared to data reported in the survey of Keim/Vogels/Vogels, 2020 JCO Study of Orthodontic Diagnosis and Treatment Procedures (JCO/October 2020, p. 581 et seq.).

Invisalign® is a registered trademark of Align Technology.

50% less refinements than other aligners¹

Less refinements mean you can be confident with your case plan and achieve more predictable outcomes for higher patient satisfaction.

SureSmile® Aligner

Other aligner brands

Three months faster treatment time than Invisalign®²

73% of patients are interested in straightening their teeth with clear aligners if the treatment length is less than nine months.² Shorter treatment times can mean higher patient acceptance and greater practice growth.

SureSmile® Aligner

Invisalign®

Works with most scanners

Love your scanner, but want a better clear aligner option? SureSmile Aligner's open-architecture helps to minimize the impact of switching aligners while ensuring you make the most of your scanner investment.
